Custom Fabricated Metal Panels

CENTRIA

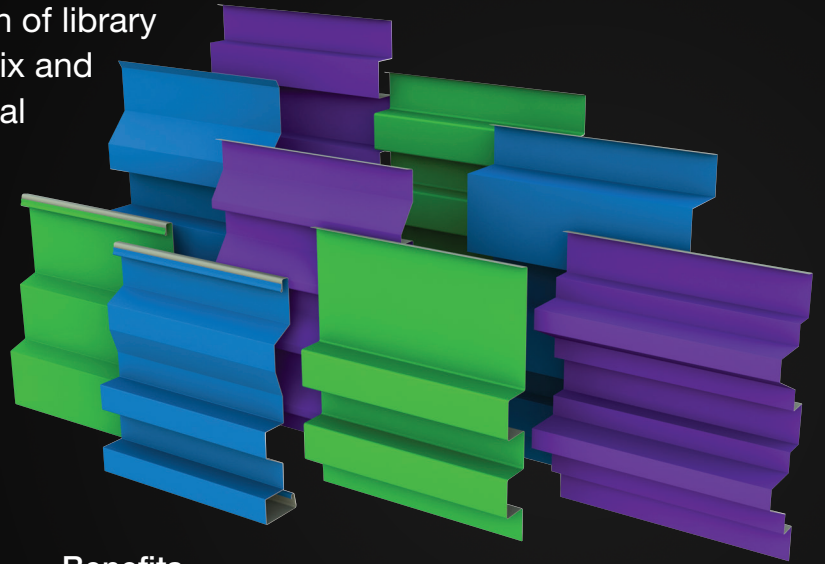

PARADIGM

Custom Fabricated Metal Panels

CENTRIA's Paradigm custom fabricated metal panels are now available to add that special touch to your exterior wall design. Select from Paradigm's collection of library shapes or custom design your own profile. Mix and match with other CENTRIA Profile Series metal panels to create a unique building facade.

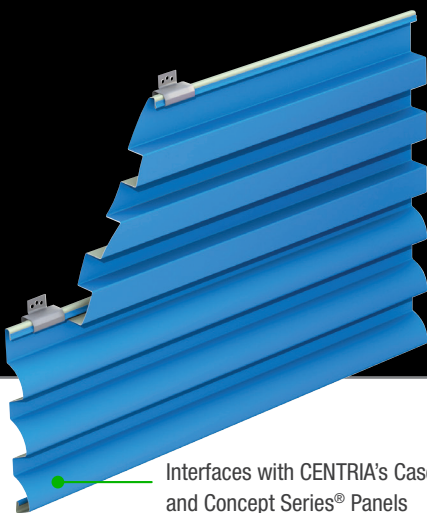

Features

- Designer customized panel profile shapes
- Concealed Fastener and Exposed Fastener options available
- Custom engineered panels with load calculations and Professional Engineer stamps
- State of the art production process
- Vertical or horizontal installation
- Available in smooth or stucco embossed finishes
- Select from CENTRIA's color and finish options
- All-weather installation capability
- CENTRIA Consultative Service

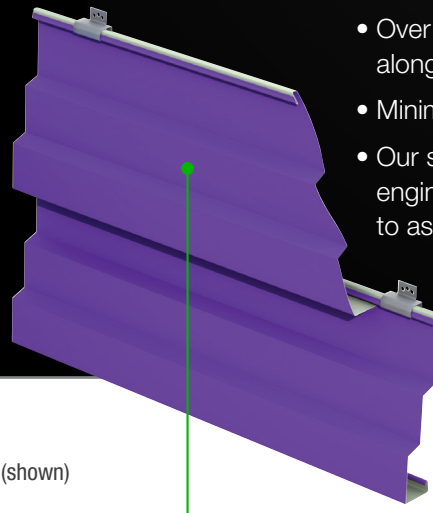

Benefits

- Unique project-specific aesthetics and flexibility.
- Confidence that panels meet load and code requirements of the project
- Ensures crisp and consistent panel fabrication quality
- Permits variation in design and shadow relief
- Ability to match and compliment other material textures
- Over 85 standard colors and 11 finish options available along with custom color availability
- Minimizes delays and permits fast-track scheduling
- Our sales team, along with a dedicated group of in-house engineers, architects and building scientists are available to assist in making your product vision a reality

Interfaces with CENTRIA's Cascade (shown) and Concept Series® Panels

Concealed Fastener Paradigm interfaces with one another seamlessly
